

plastic

SEM Plastic was established in 1975 by N. Kemal EROĞLU and his partners who is a Mechanical Engineer and former trade Manager of the largest Turkish Agricultural Machine Production Company "Tara", to produce Agricultural Machine parts by means of Injection Molding. SEM Plastic used the knowledge and experience it has gained from Agricultural Machine Parts production until 1980's; to become an OEM for Electronic and Telecommunications sector that needs precise standards and very small tolerances and served as sole supplier for honorable companies like ALCATEL, Northern Telecommunications and Termal. In 1982 using knowledge and the quality advantage gained from precise productions for Electronics and Communication Sector and the market demand SEM Plastic started investing in "Production of Plastic Disposables and Airline Catering Containers" thus resulting in a wide range of products and specialization in the field of business.

Currently, SEM Plastic makes production in two plants that enables us to offer better transportation rates and delivery times, namely, in the Istanbul (Most industrialized city in West of Turkey) plant of 1800 m<sup>2</sup>, and in Malatya (Most industrialized city in Southeast of Turkey) plant of 8500 m<sup>2</sup>. Especially because of its closeness to countries that have coast to Mediterranean and Middle East; Malatya Plant has a strategical importance. Up-to date, brand new technological machines and molds from Europe's top machine producers (Netstal, Demag, OMV etc.) is in production in this plant producing without manual contact in hygienic conditions. That's why SEM Plastic clients are aware and confident about their hand being first to touch to the product purchased.

SEM Plastic's business is split between the three major manufacturing processes - extrusion, thermoforming and injection molding - utilizing all the major polymers (PP, PS, ABS, PVC and PET). Our production range includes PP, PS, ABS Extruded Sheet, Thermoform drinking Cups, Injection Crystal Cups, Polycarbonate Cups, Plates, Food Containers, Salad Bowls, Sauce Cups, Ice-Cream Cups, Lids, catering Containers, Trays, Cutlery, Straws, disposable tableware in family packs for chain stores, branded and decorated cups, served to a wide variety of markets including food and drink, catering, pharmaceuticals, industrial, household items, toiletries and cosmetics, and promotional packaging. We have a finished product capacity of 4.000 Tons annually, and the extra 3.000 tons of extruded sheet (0,2 mm. - 2.0 mm) that are in excess of our finished product capacity is sold to other Thermoformers in semi-finished sheet form. Backed by 25 years experience, SEM Plastic serves more than 380 companies worldwide of those which are 20 airline companies worldwide, as well as other Travel organisations and suppliers like railway companies, ferries, food processors and caterers. We are proud to serve clients like Turkish Airlines, Air Alfa, Pegasus Airlines, S.A.S Catering, Lufthansa Air Catering, Mc Donald's, METRO Grossmarket as major suppliers domestically and internationally for years.

Apart from the molds imported from Europe's top mold makers, SEM Plastic is running an in-house mold making department with high technical capabilities and well trained personnel since established, thus giving us the chance to construct a mold for your project in very short period and start production immediately.

Currently exporting to 20 countries in three continents, we follow our client's requirements and their markets with great attention and produce quality products for their markets with Total Quality Management System. We also share our expertise on products, export documentation, cheap freight, market information and many other aspects with our clients. To ensure the competitiveness of our customers we import our raw materials from World approved polymer producers from more than 12 countries worldwide with compatible prices and reflect this benefit to our customers. Hygiene, Health Issues, Environmental Management and Recycling are key factors in our decision taking and production thus necessary checks and certification is made available starting from polymer choosing stage, to storage, to production and finally to delivery procedures. (Certification from Turkish Standard's Institute, Health Ministry Approval, Ministry of Agriculture approval and corresponding international certificates). Our company is preparing for ISO9000 with professional consultants and we are at the certification stage. All our products are from Prime - Virgin 1. Class raw materials and are recyclable. Environmental awareness is what we respect here in SEM Plastic and thus we are the founder and sponsor members of well-known ITU Cevkor Organization. (Well Known local environmental activist group.)

SEM Plastic is a pioneer company in its sector, thus was the first one to produce Crystal Injection Molded Cups, that has put lots of new models to market, First one to bring full automatic in-line thermoforming to Turkey, First to produce Thermoform Polypropylene Cup, First and still the only to produce %100 Thermoform PS Crystal Clear Cups and much more innovations for the clients.

SEM Plastic is proud to serve its clients as a one point to all requirements; by means of wide range of products, fast realization of new product projects by highly capable mold making department and export oriented experienced sales team.

Thanks to our roots that supply us with experience, as young and dynamic SEM Plastic family, we know that our success depends only on our achievement to make you and your services successful.
